

Services

Below we have identified and provided links to a number of services that are either:

- Installed on your Proxee and are ready to use.
- Are installed on your Proxee, but need registration or subscription for you to use them.
- Are not installed on your Proxee and need a download, registration or subscription for you to use them.

Installed programs may be upgraded without affecting the operation of your Proxee (e.g., upgrading from Hulu to Hulu Plus). You may uninstall or replace any of the installed software on your Proxee (it's your computer), but you may not be able to use the full functionality of your Proxee.

Categories/Services	Description	Links
UTILITIES:		
AVG:	Virus protection software that is free, is already installed on your Proxee and can be accessed through the Start menu. An upgrade is available:	http://www.avg.com/us-en/upgrade?re=hpen001
